INVESTIGATION AND STUDY REGARDING ADEQUACY OF GRAIN STANDARDS; CHANGES IN STANDARDS; REPORT TO CONGRESS BY OCTOBER 21, 1978

Section 24 of Pub. L. 94-582 provided for an investigation and study to be made by the Administrator of the Federal Grain Inspection Service regarding the adequacy of the grain standards established under this chapter in relation to the needs and concerns of domestic and foreign grain buyers, with the Administrator to seek the advice of or employ the services of representatives of the grain industry, land grant colleges and other members of the public, the study to address specifically, without being limited to determining (A) if standards may be developed that would reduce grading errors and remove, where possible, subjective human judgment from grading by increased utilization of mechanical, electrical, and chemical means of grading, (B) whether grain should be subclassed according to color or other factor not affecting the quality of the grain, (C) whether the protein factor should be included in the standards, and (D) whether broken grain should be grouped together with foreign material, and the Administrator, as a result of such study, to make necessary changes in the grain standards in accordance with section 75a of this title, and to submit a report to Congress setting forth the findings of the study and actions taken as a result thereof not later than two years after Oct. 21, 1976.

carrier in which it is to be transported from the United States) in accordance with such standards or procedures, and unless a valid official certificate showing the official grade designation and certified weight of the lot of grain has been provided by official inspection personnel and is promptly furnished by the shipper, or the agent of the shipper, to the consignee with the bill of lading or other shipping documents covering the shipment: *Provided*, That the Secretary may waive the foregoing requirement in emergency or other circumstances which would not impair the objectives of this chapter: *Provided further*, That the Secretary shall waive the requirement for official inspection whenever the parties to a contract for such shipment of a lot of grain (which is not sold, offered for sale, or consigned for sale by grade) from the United States to any place outside thereof mutually agree under the contract to ship such lot of grain without official inspection being performed and a copy of the contract is furnished to the Secretary prior to shipment;

(2) except as the Secretary may provide in emergency or other circumstances which would not impair the objectives of this chapter, all other grain transferred out of and all grain transferred into an export elevator at an export port location shall be officially weighed in accordance with such standards or procedure: *Provided*, That, unless the shipper or receiver requests that the grain be officially weighed, intracompany shipments of grain into an export elevator by any mode of transportation, grain transferred into an export elevator by transportation modes other than barge, and grain transferred out of an export elevator to destinations within the United States shall not be officially weighed; and

(3) except as otherwise authorized by the Secretary, whenever a lot of grain is both officially inspected and officially weighed while being transferred into or out of a grain elevator, warehouse, or other storage or handling facility, an official certificate shall be issued showing both the official grade designation and the certified weight of the lot of grain.
